CUSTOM COLORING IN-STONE

1. Start matching process as with any other product.

2. Enter a high quality exterior latex paint as the product being tinted.

3. Read sample and start with 1/10th of the recommended formula. Round all colorants up to at least 1 full unit or point.

4. Apply liquid sample to the item being matched, allow to dry and adjust as necessary. *If the item being matched is not available a standard concrete gray block works well.*

5. IN-STONE is a semi-transparent masonry stain, you can apply up to 3 coats. Color will darken and develop with each coat.
